---

## SKILLS:

Terminal, WSL, IntelliJ IDEA, Git, PostgreSQL, OOPs, Java, DSA, Operating Systems, Spring Boot, Gradle, Postman, Linux, Ubuntu, Rest API, MySQL & PostgreSQL

## EDUCATION:

Master of Business Administration (*Chetna's H.S. College of Commerce*)

2016-19

Bachelor of Computer Application (*St. Andrew's College of Arts & Commerce*)

2013-15

## WORK EXPERIENCE:

**Alchemist Marketing & Talent Solutions, Mumbai** (Jan 2023 – June 2024): *Consultant Sr. Web Developer*

- Developed customized websites and high-conversion landing pages for prominent global real estate brands, ensuring alignment with client specifications and brand identity.
- Improved application speed and responsiveness by 30% through codebase optimization, modular architecture refinement, and performance tuning techniques.
- Collaborated with design, content, and project management teams to ensure smooth delivery cycles, resulting in high client satisfaction and on-time project completions.

**Beacon Payroll and Benefits, Mumbai** (Sep 2019 – Oct 2020): *Software Developer*

- Designed, developed, and maintained the company's internal HRMS platform and corporate website, supporting end-to-end employee management and payroll functionalities.
- Led the transition from manual attendance systems to a fully automated digital tracking solution, reducing errors and boosting operational efficiency.
- Worked closely with HR and product teams to ensure feature compliance with internal policies and seamless integration of payroll modules.

**Livotech India, Mumbai** (May 2018 – Aug 2019): *Jr. PHP Developer*

- Engineered and deployed dynamic web applications for a range of clients, utilizing PHP and MySQL to deliver functional, scalable solutions.
- Oversaw full project lifecycle—from gathering requirements to coding, testing, and debugging—ensuring delivery within scope and deadlines.
- Interacted directly with clients to gather detailed requirements and translated them into technical deliverables aligned with business goals.

## PROJECTS:

**KrimsonKourses CLI App Capstone Project (Java, OOP, CLI Design)**

- Developed a robust command-line application to manage courses and student data, including functionalities for adding, assigning, and viewing records.
- Utilized OOP principles and data structures such as maps and sets to ensure efficient data handling, uniqueness, and clear relationships.
- Implemented comprehensive input validation, error handling, and edge-case coverage to deliver a reliable and user-friendly experience.

**Stockify - OOPs End Track Exam Project**

- Conducted a detailed analysis across multiple dimensions, including order trends, completion rates, customer behavior, and delivery metrics, to identify patterns and optimize operational strategies.
- Utilized advanced Excel data analysis techniques to explore correlations and derive insights across multiple dimensions.
- Derived a responsive and reliable CLI tool with real-time feedback and error handling to enhance operational control and support decision-making processes.

## ACHIEVEMENTS:

**Certification:** Software Development with Backend Specialization, SkilloVilla (2025).

Completed 500+ hours of intensive backend training through a structured bootcamp.

Gained hands-on experience in developing, testing, and deploying Spring Boot applications.

Covered core backend concepts including REST APIs, Spring Data JPA, Hibernate, MySQL and deployment best practices.
